1 Github

Figure 1: Github repository

1.1 Consistency and standards

All pages in Github use a same design language that achieves coherence and unity. The color black and white, used the most. The icon color is green. And all those give user an enjoyment while using Github.

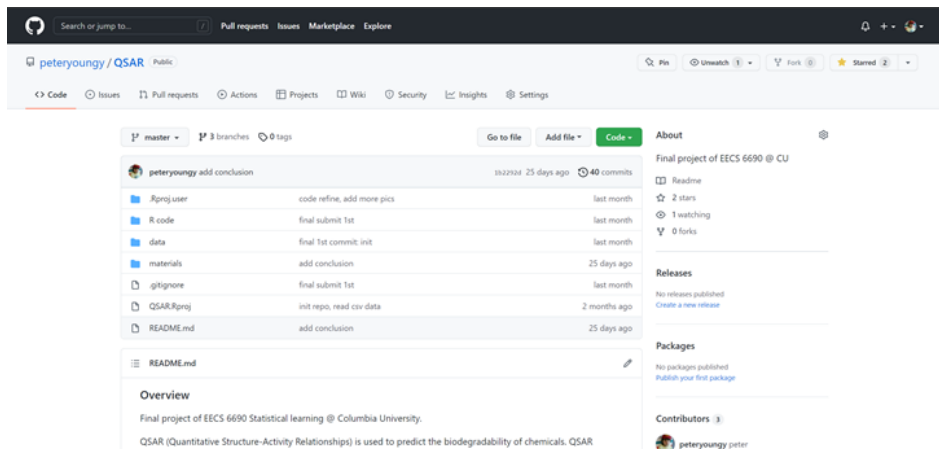

Figure 2: Github repository

1.2 Aesthetic and minimalist design

The main repository page is super simple and minimal, only useful information is listed on the screen for developers to quickly explore the core content of Github. That makes users to achieve efficient code management when developing.
